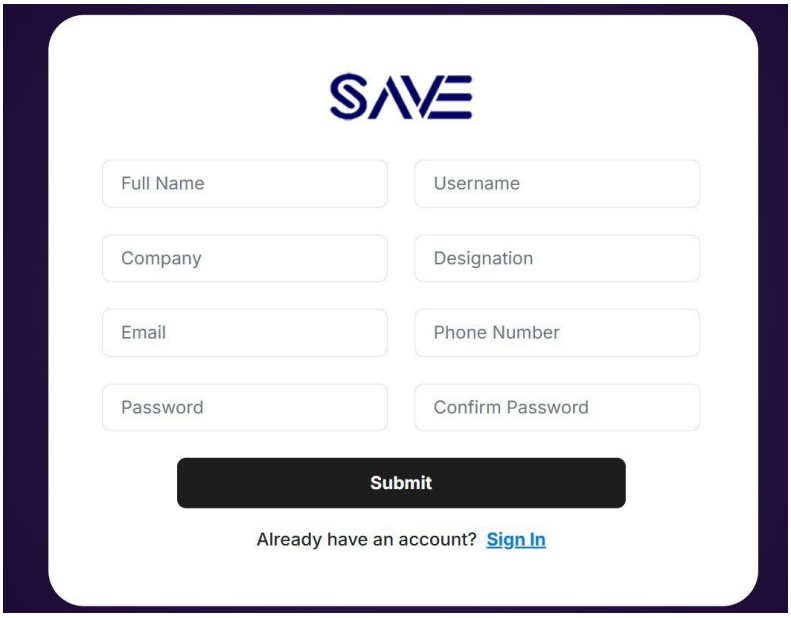
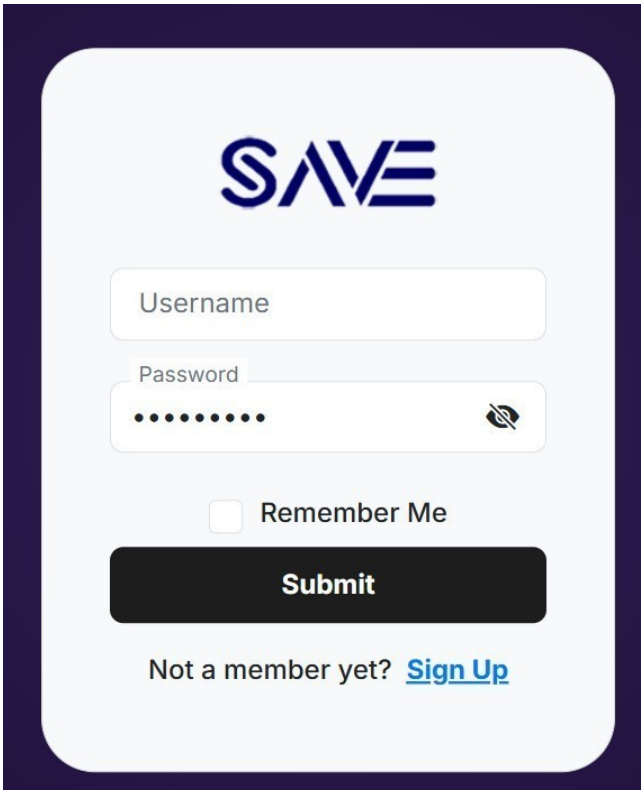
TESTING REPORT:

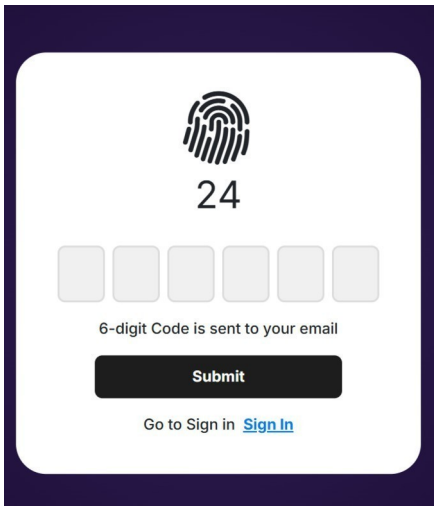
1. **Signup** using SAVE - Secure AI based Vulnerability Assessment Tool for Enterprises Link.



2. **Sign In** using given username and password

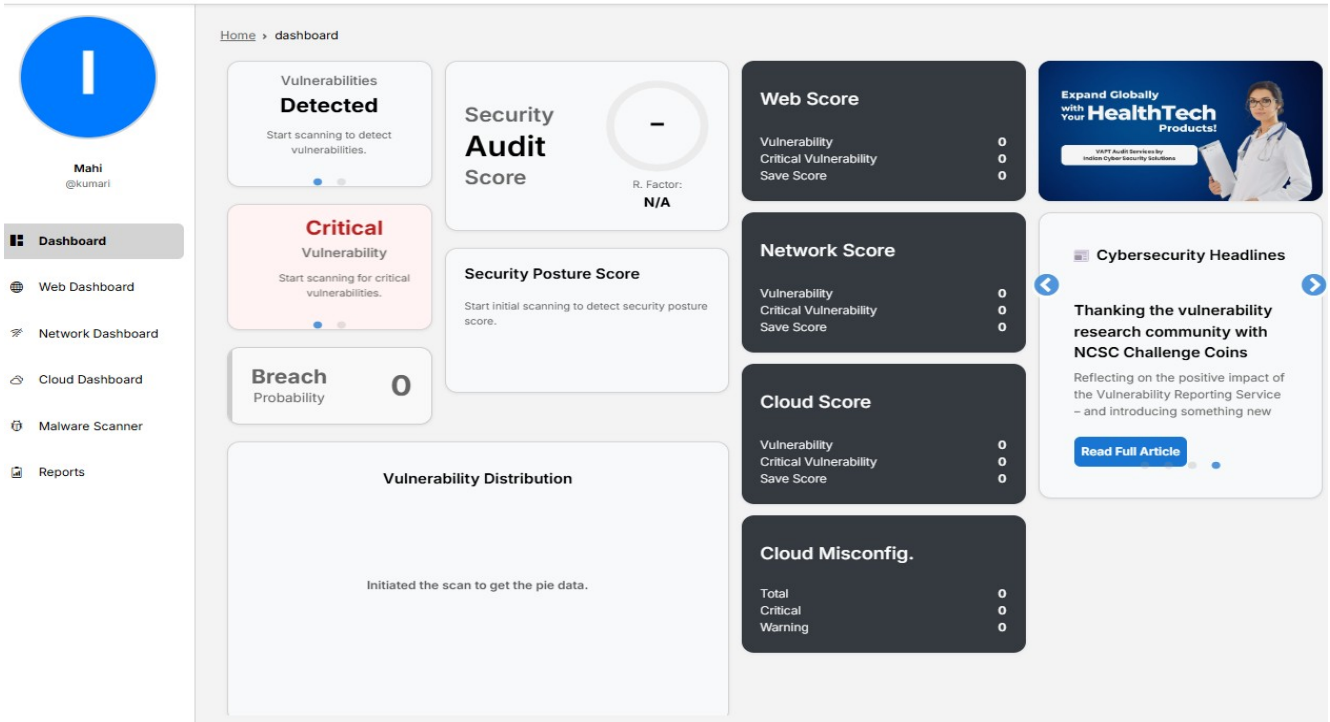


3. **After Sign In** it will send a 2FA code in your registed email-id.

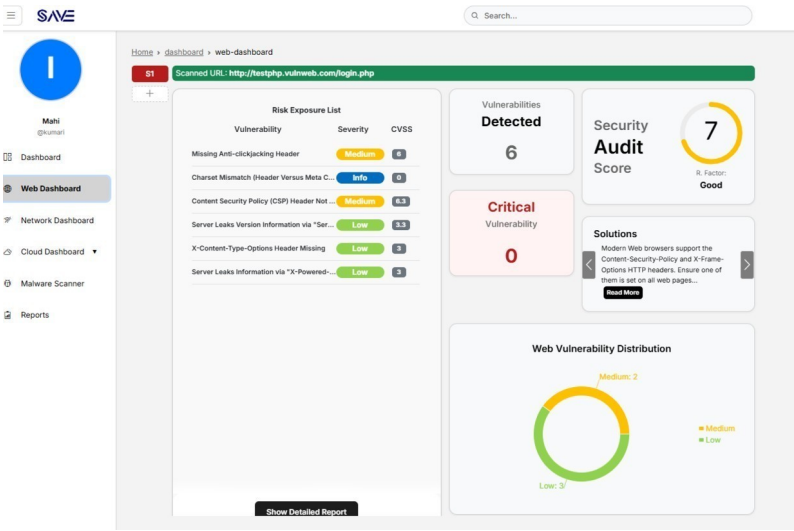


Enter 2FA code here.

4. **Dashboard** will appear.



5. For Testing Web Scan Click **Web Dashboard** in left side navigation.

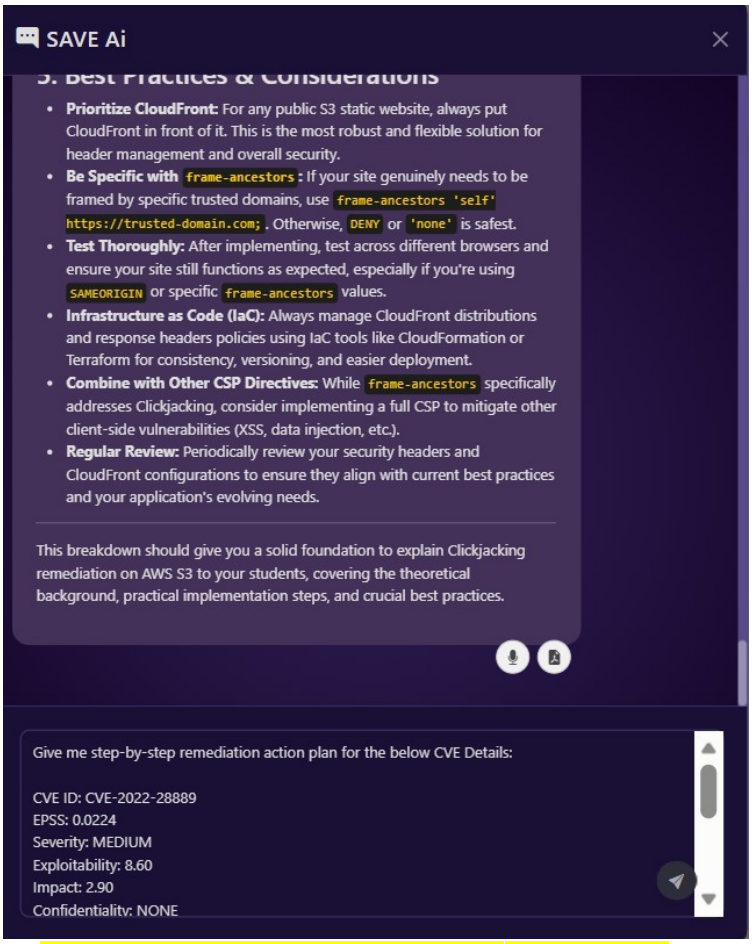


I. This is risk exposure table

II. EPSS Card will popup by clicking any of the severity from the risk exposure table.

CVE ID	EPSS	Severity	Exploitability	Impact	Confidentiality	Integrity	Availability	Base Score
CVE-2022-28889	0.022440	MEDIUM	8.60	2.90	NONE	PARTIAL	NONE	4.3
CVE-2023-41897	0.018750		0.00	0.00				0.0
CVE-2024-42487	0.017880		0.00	0.00				0.0
CVE-2022-38115	0.014940		0.00	0.00				0.0
CVE-2023-6867	0.009640		0.00	0.00				0.0
CVE-2024-39320	0.008700		0.00	0.00				0.0
CVE-2022-2179	0.008210		0.00	0.00				0.0
CVE-2022-46695	0.007510		0.00	0.00				0.0
CVE-2022-45096	0.006790		0.00	0.00				0.0
CVE-2024-55629	0.006500		0.00	0.00				0.0
[illegible]	0.006490		0.00	0.00				0.0

III. You can click on any CVE ID to redirect the Save AI for remediation.

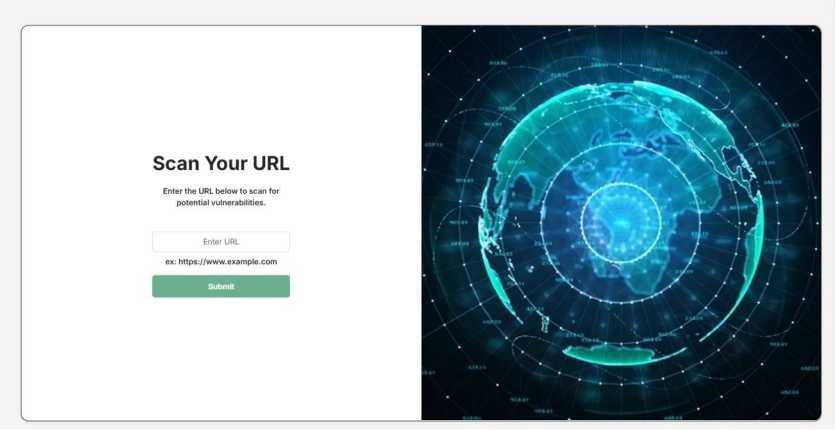


I. Note:-(All the severity and cve id is working)

II. You can use mic button for audio and to download the solution, click pdf button.

A. For new scanning Click on + **symbol in web dashboard.**

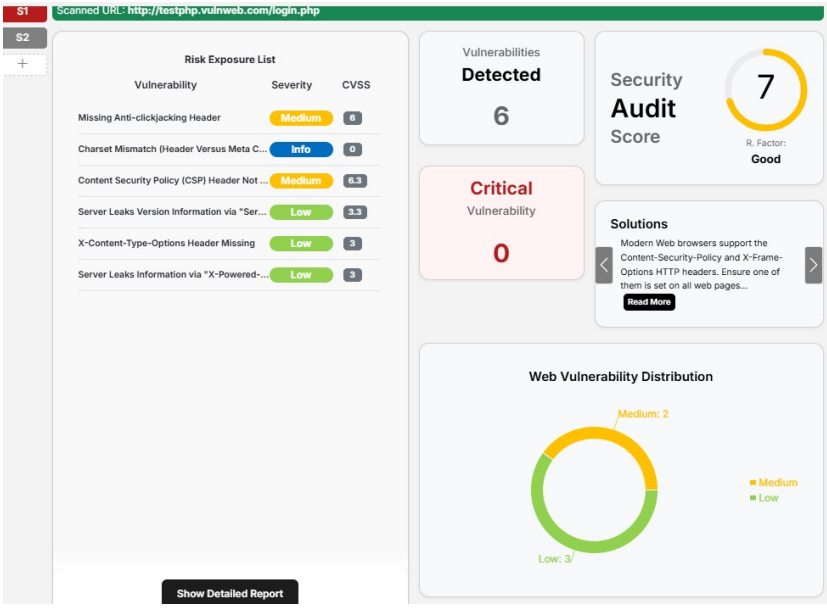
B. It will redirect to this page



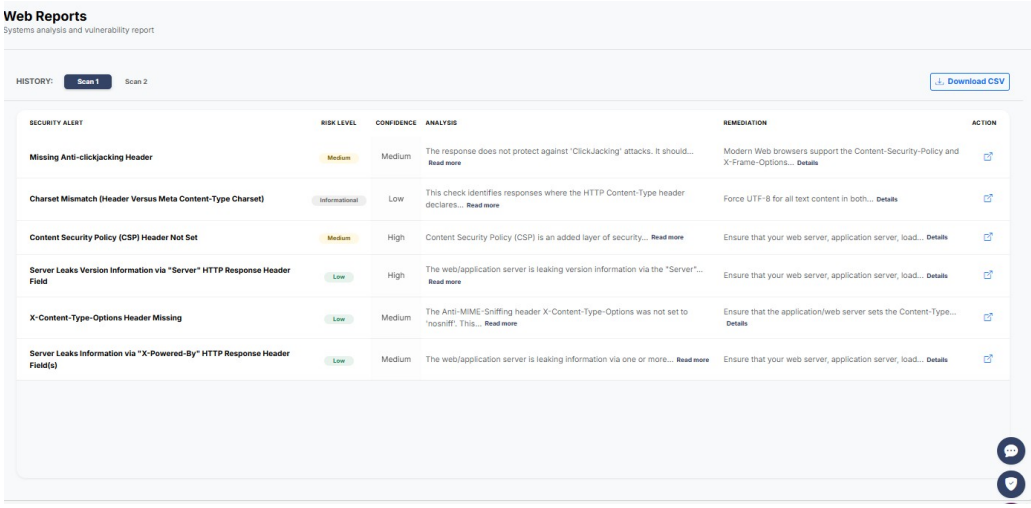
C. Enter URL

http://testphp.vulnweb.com/login.php and Click Submit.

D. It will show the details

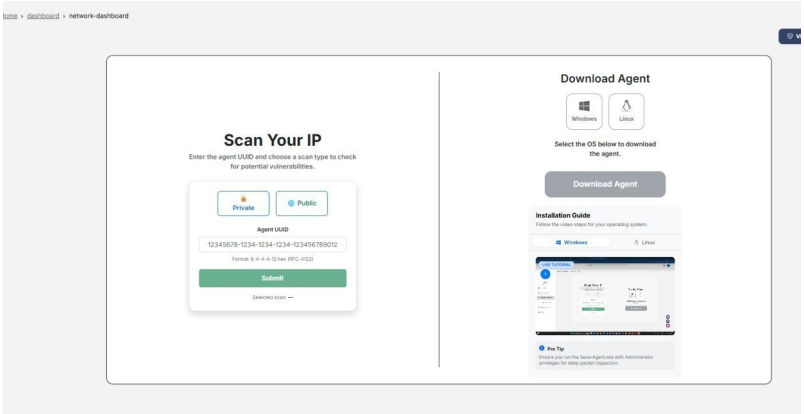


F. To see the Detailed report Click on the show detailed report button.



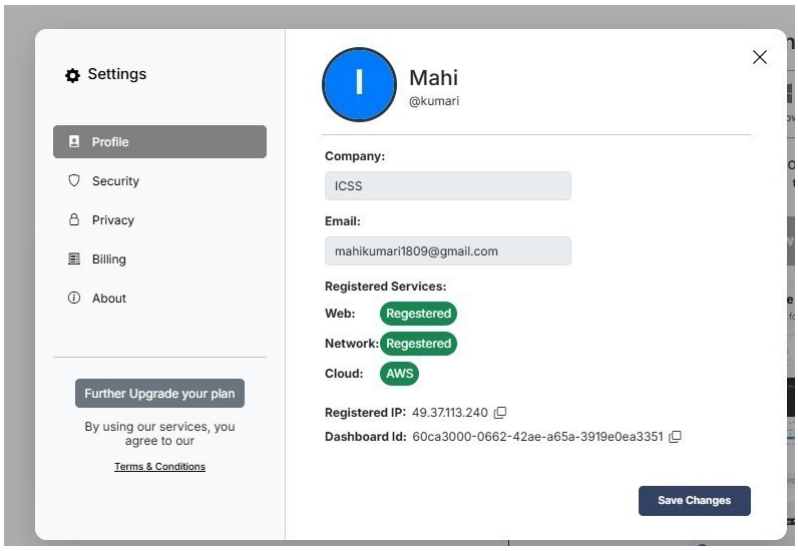
G. To download the report click on the Download CSV button in top right corner.

6. For Scanning Network Click **Network Dashboard** in left side navigation



A. For Scanning Network you need to Download Agent
B. Choose Window or Linux and click on Download Agent Button.

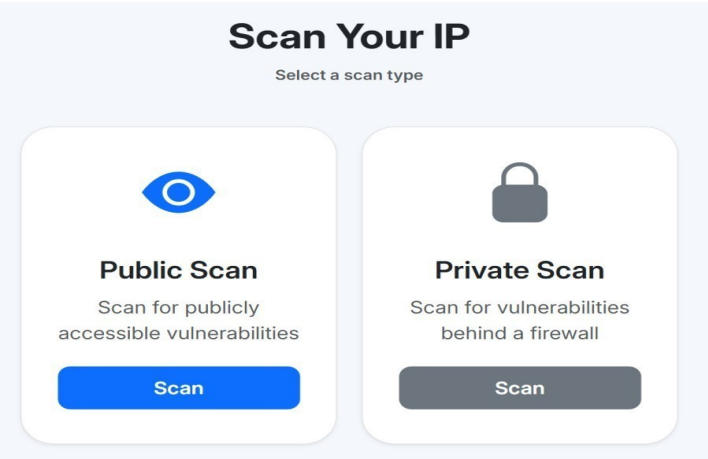
C. After Downloading Extract the fileGo to the setting and copy the Dashboard Id



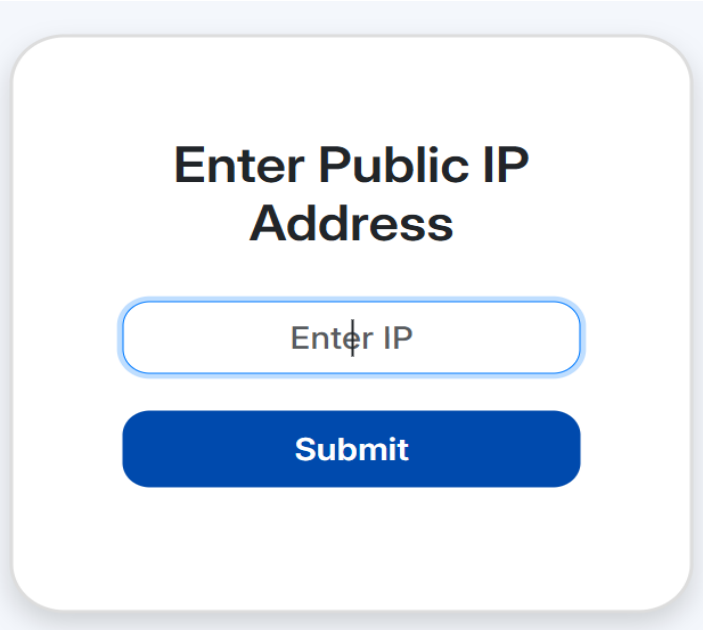
D. Find Save-agent application in extracted file and open it.

E. 
F. Paste the ID here and enter your password

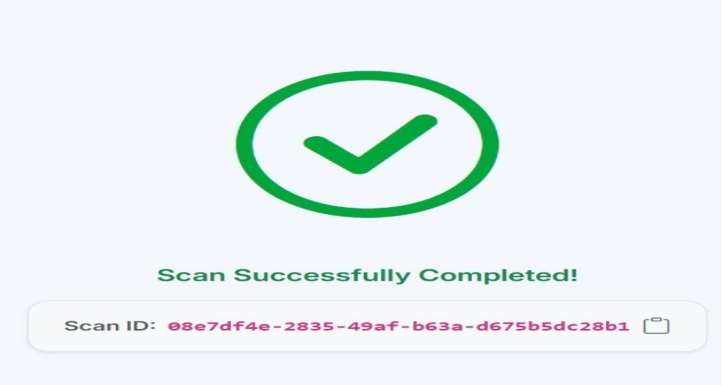
G. You have to scan two IPs (Public and private)



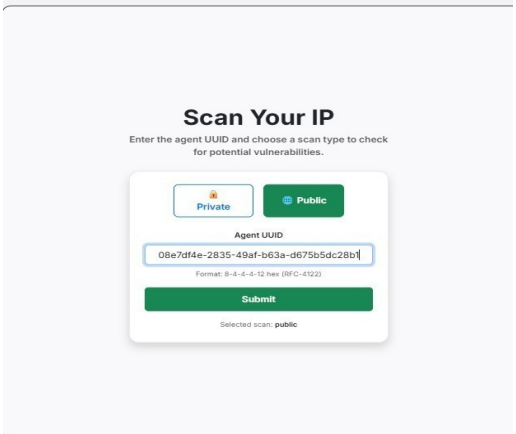
H. Click on Public scan.



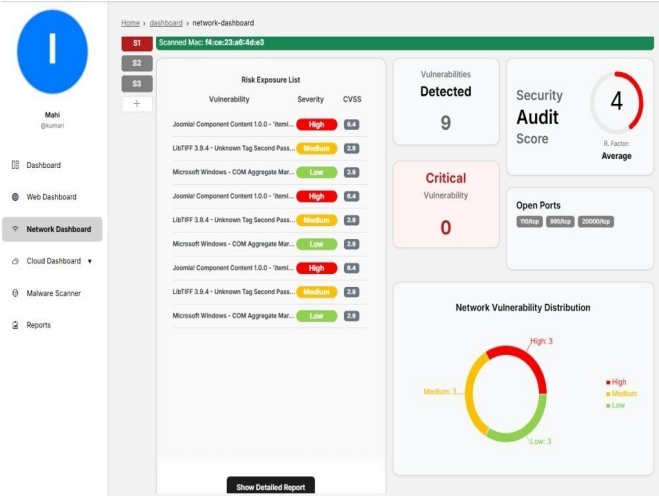
I. Enter 82.29.166.206 this IP here and click submit button.
J. It will scan and appear like this



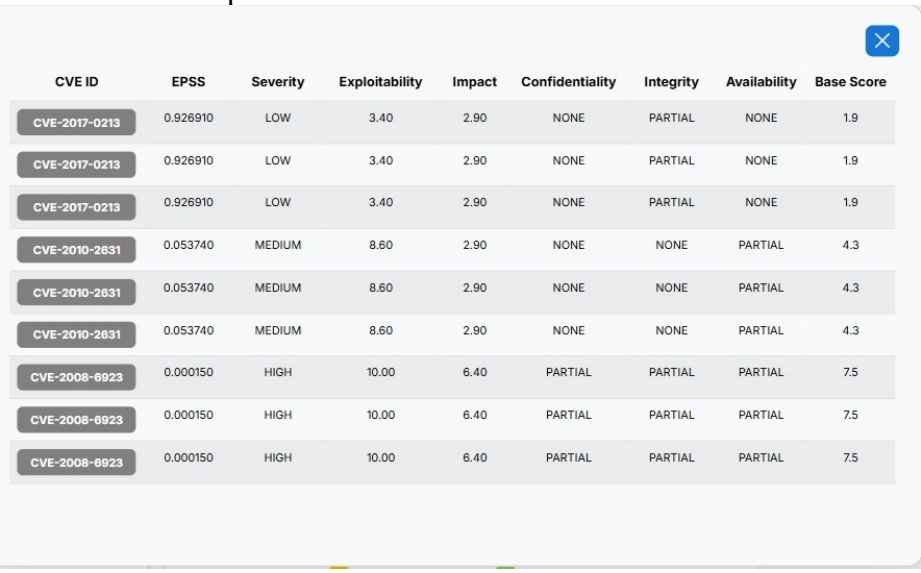
K. Copy the Scan ID.
L. Click on Logout button.
M. Go to the dashboard
N. Move to the network dashboard



O. Click on Public and paste the Scan ID , click submit button.

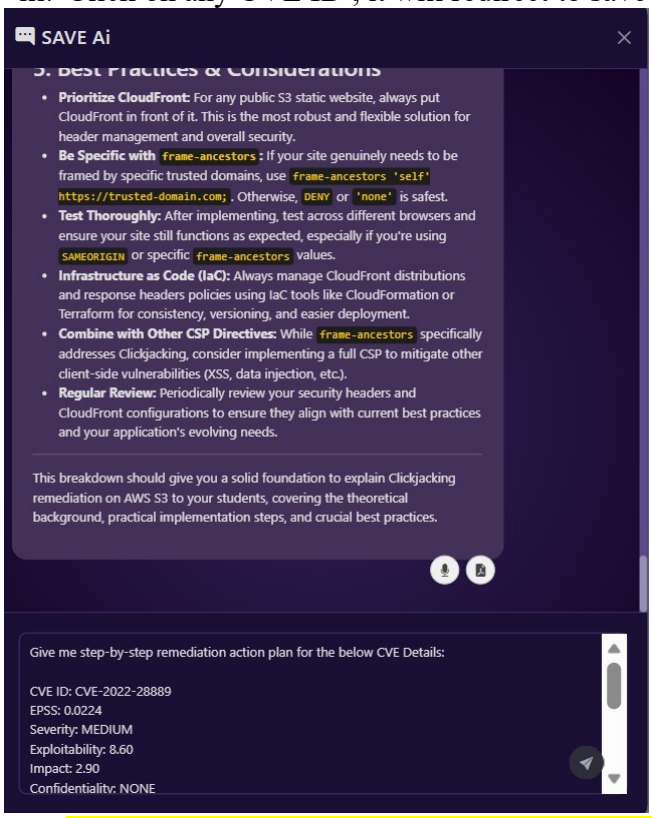


i. This is the Risk exposure list
ii. EPSS Card will popup by clicking any of the severity from the risk exposure table.



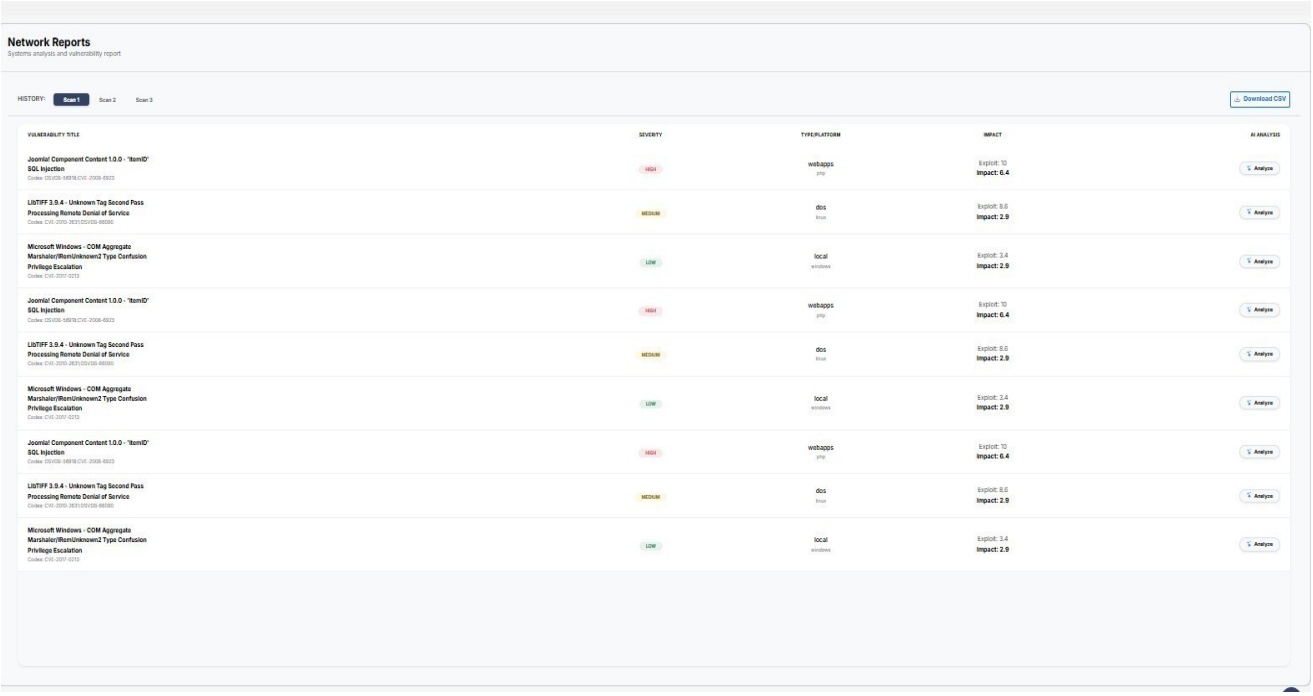
CVE ID	EPSS	Severity	Exploitability	Impact	Confidentiality	Integrity	Availability	Base Score
CVE-2017-0213	0.926910	LOW	3.40	2.90	NONE	PARTIAL	NONE	1.9
CVE-2017-0213	0.926910	LOW	3.40	2.90	NONE	PARTIAL	NONE	1.9
CVE-2017-0213	0.926910	LOW	3.40	2.90	NONE	PARTIAL	NONE	1.9
CVE-2010-2631	0.053740	MEDIUM	8.60	2.90	NONE	NONE	PARTIAL	4.3
CVE-2010-2631	0.053740	MEDIUM	8.60	2.90	NONE	NONE	PARTIAL	4.3
CVE-2010-2631	0.053740	MEDIUM	8.60	2.90	NONE	NONE	PARTIAL	4.3
CVE-2008-6923	0.000150	HIGH	10.00	6.40	PARTIAL	PARTIAL	PARTIAL	7.5
CVE-2008-6923	0.000150	HIGH	10.00	6.40	PARTIAL	PARTIAL	PARTIAL	7.5
CVE-2008-6923	0.000150	HIGH	10.00	6.40	PARTIAL	PARTIAL	PARTIAL	7.5

iii. Click on any CVE ID , it will redirect to save AI for remediation



iv. Note- Every CVE ID is redirecting and every mic and pdf is working.

P. To see detailed report. Click Show detailed report.



Q.To download the report click Download CSV.

R. Now Logout from the network agent and then again login.

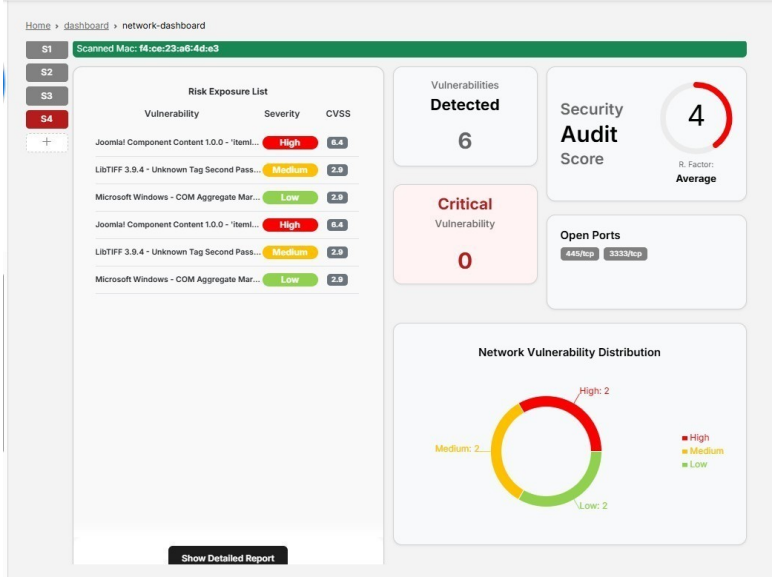
S. Now select private Scan.

T. New scan id we generate copy that.

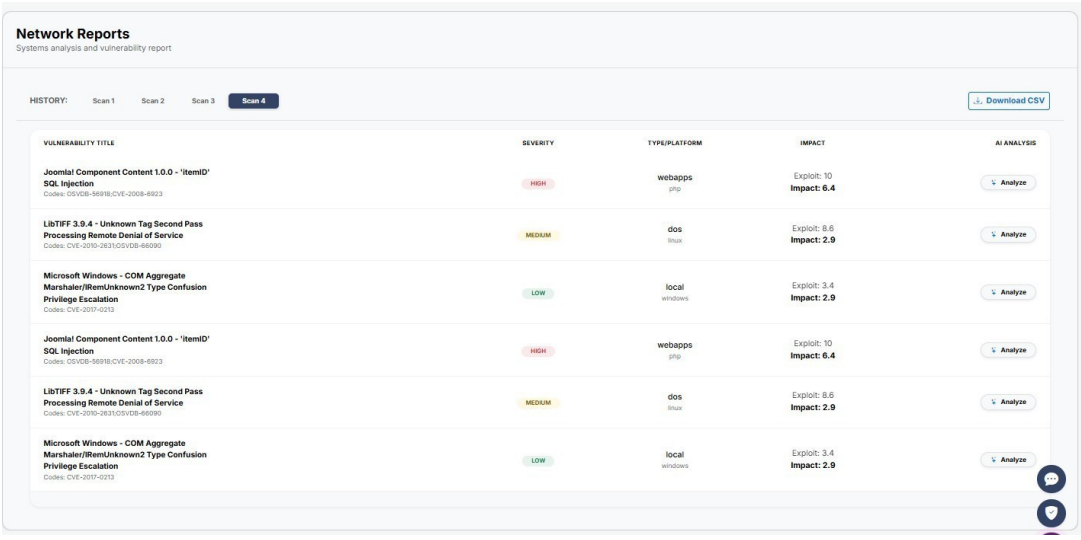
U. go to the dashboard and click on + symbol.

W.choose private for scanning IP, click submit

X. (Note – scan buttons are working)

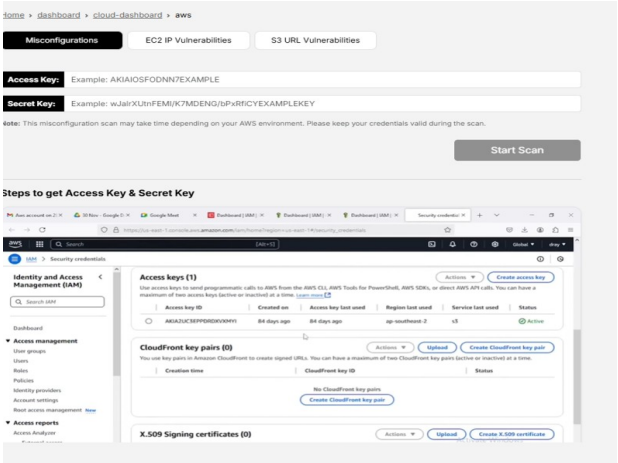


Y. Click Show Detailed Report.



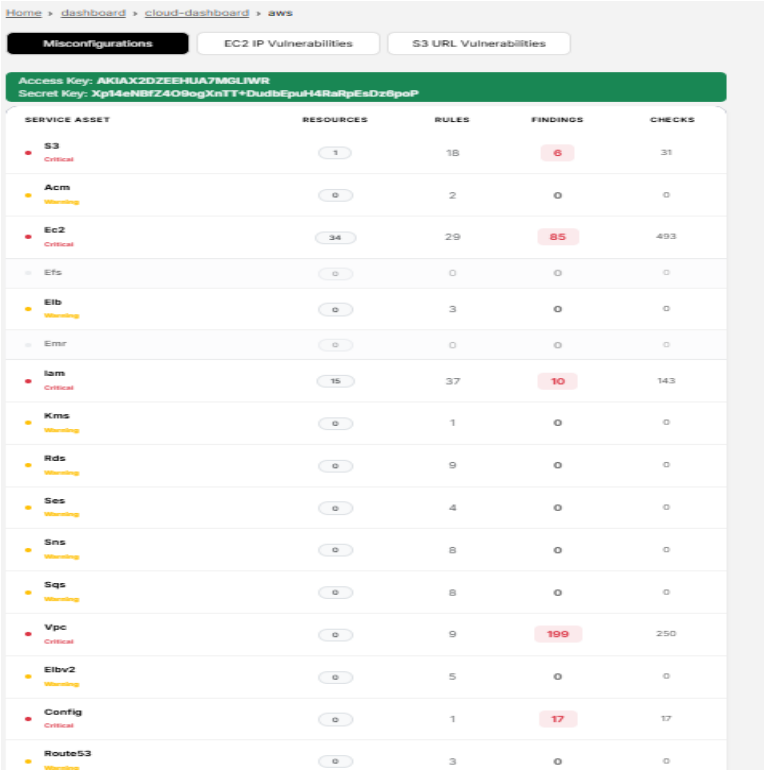
7. **For Scanning Cloud** Click **Cloud Dashboard** in left side navigation

A. Click on AWS, it will redirect to this page.



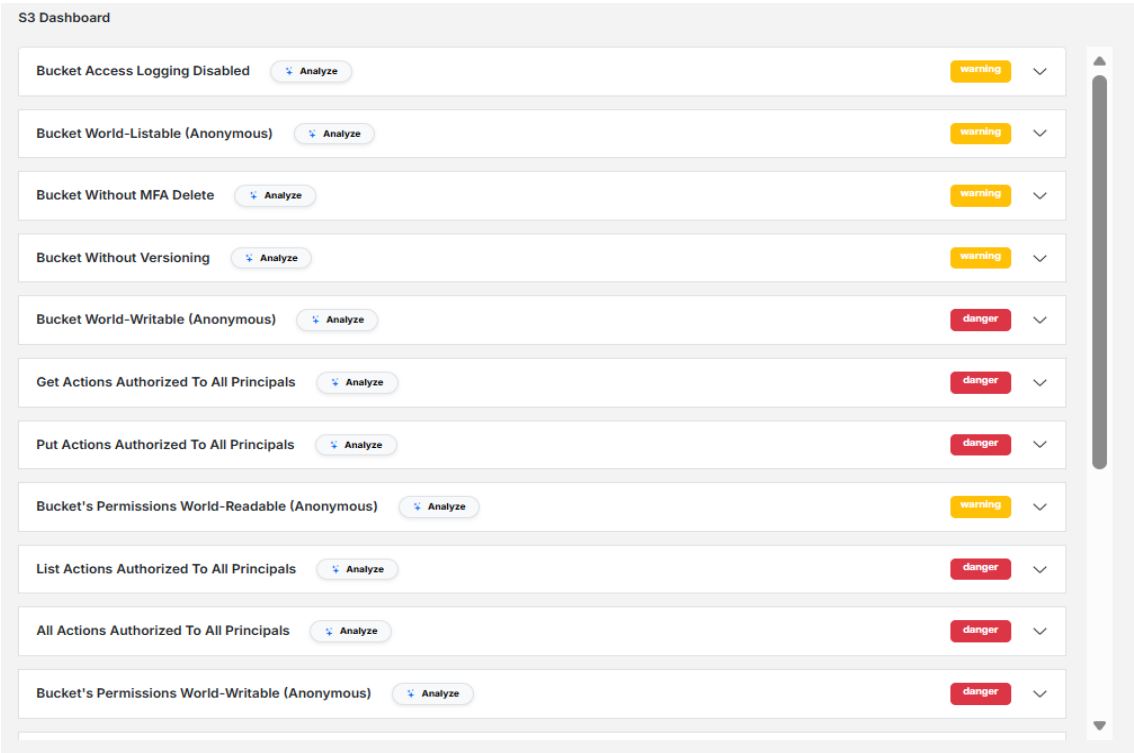
B. Use this key for the Misconfigration.

C. Access Key: AKIAX2DZEEHUA7MGLIWR
Secret Key: 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

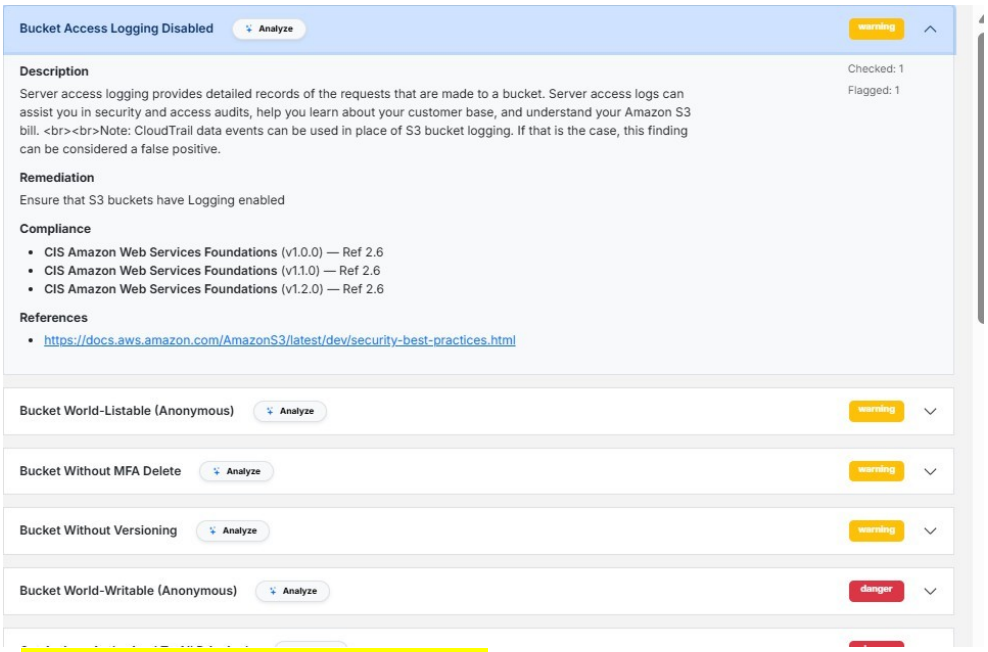


i. You can click on any Service Assets to see the Service details.

ii. Like I clicked on S3 it will redirect to

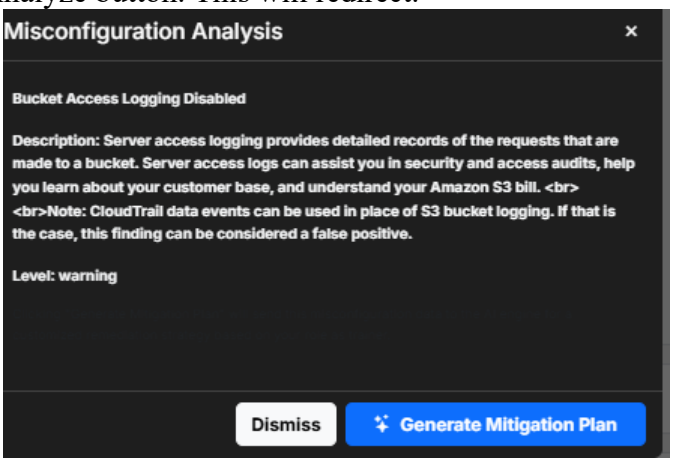


iii. To see the details of any click on drop button in right side .



iv. Note(Every drop button is working)

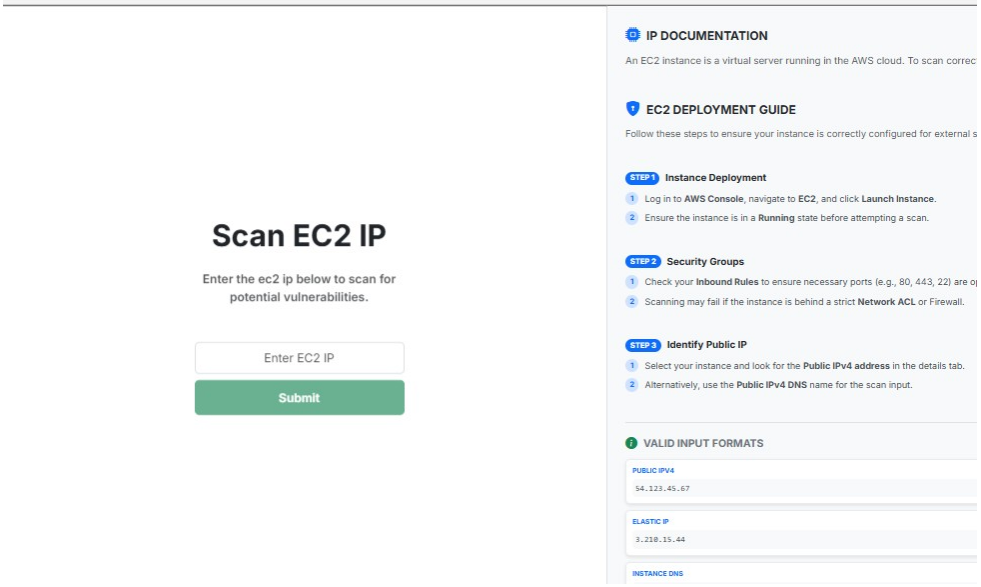
v. Click on Analyze button. This will redirect.



vi. Click on generate Mitigation Plan to open SAVE AI.

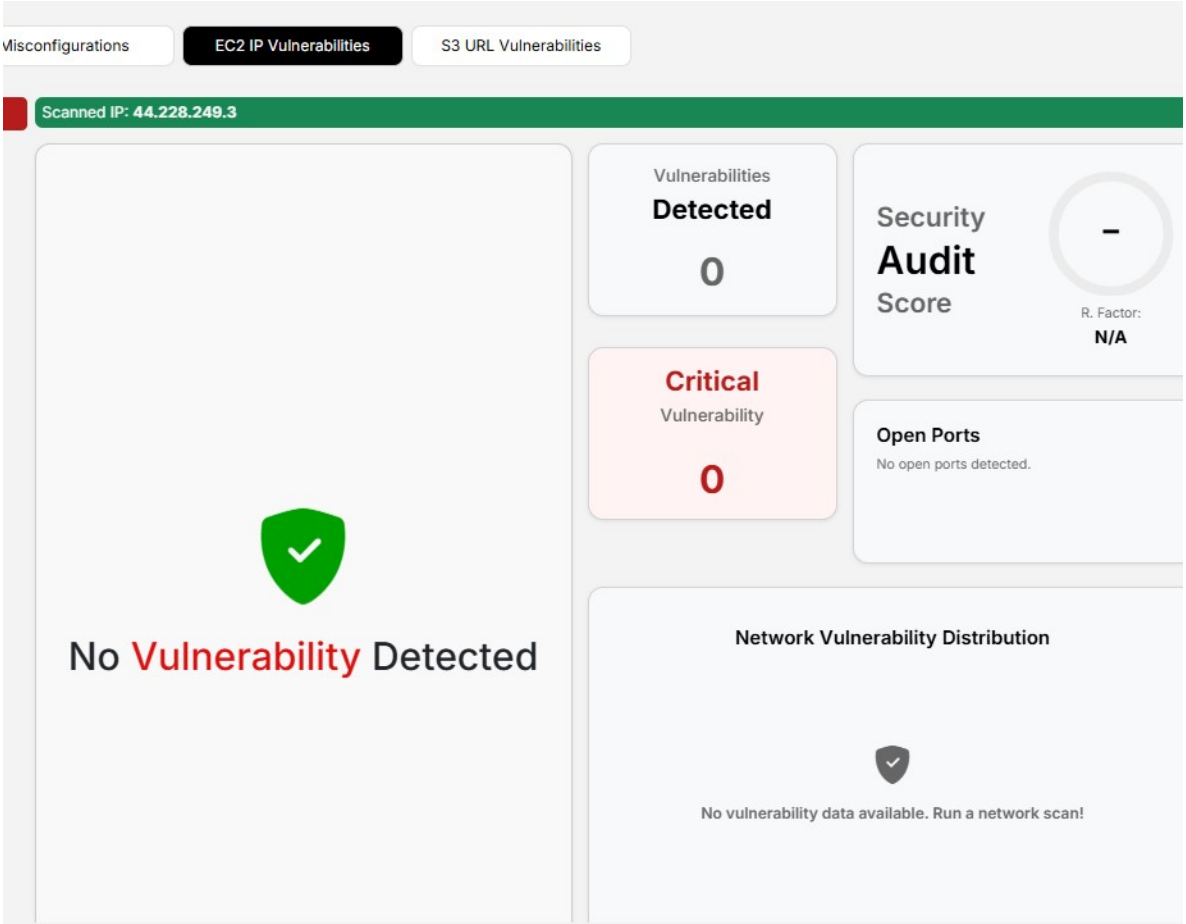
Vii. Note(Every analysis button mic and pdf button is working)

A. For testing AWS EC2 IP

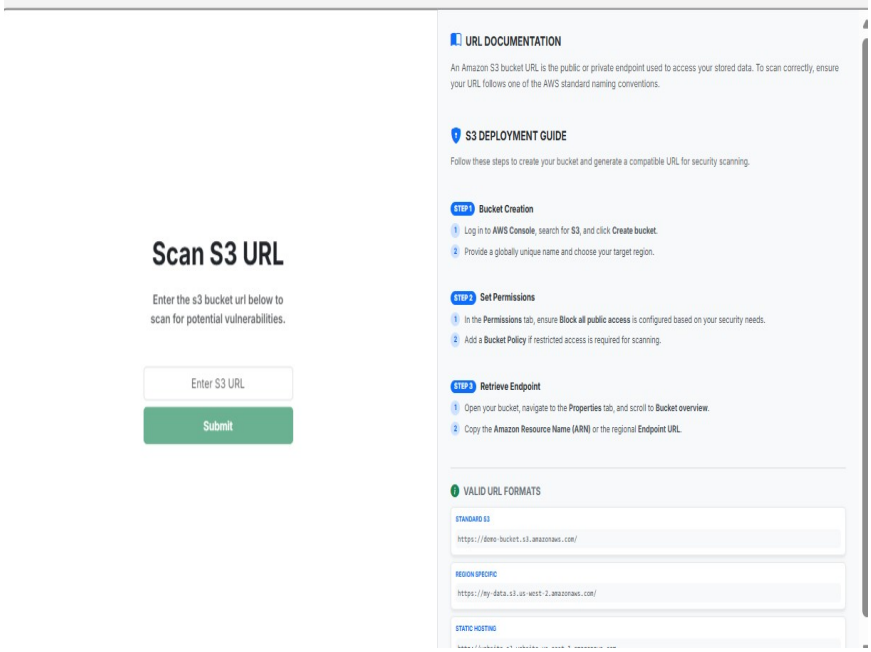


B. use 44.228.249.3

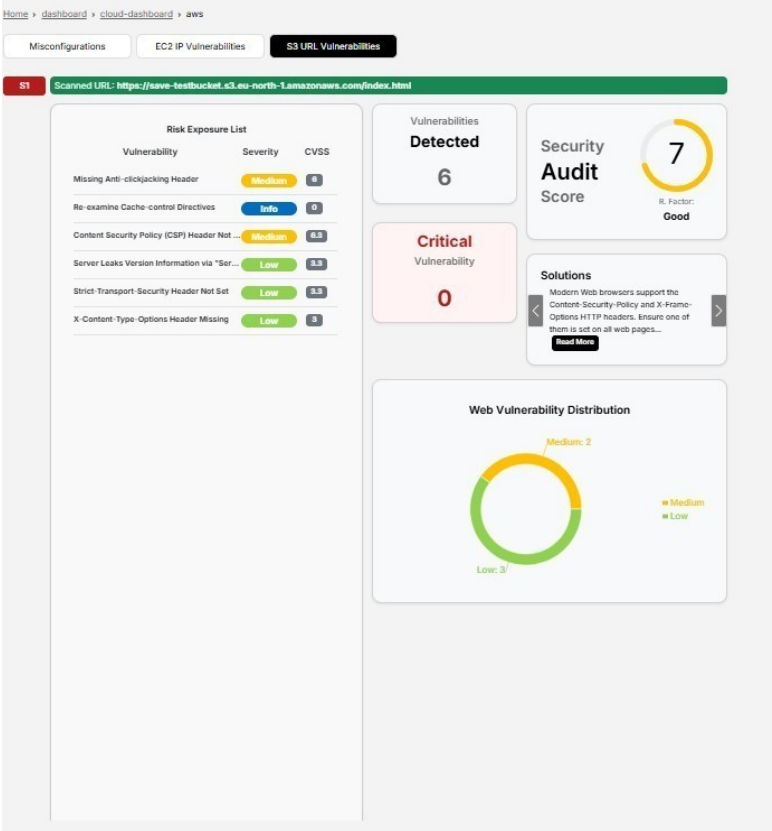
C. You can see this.



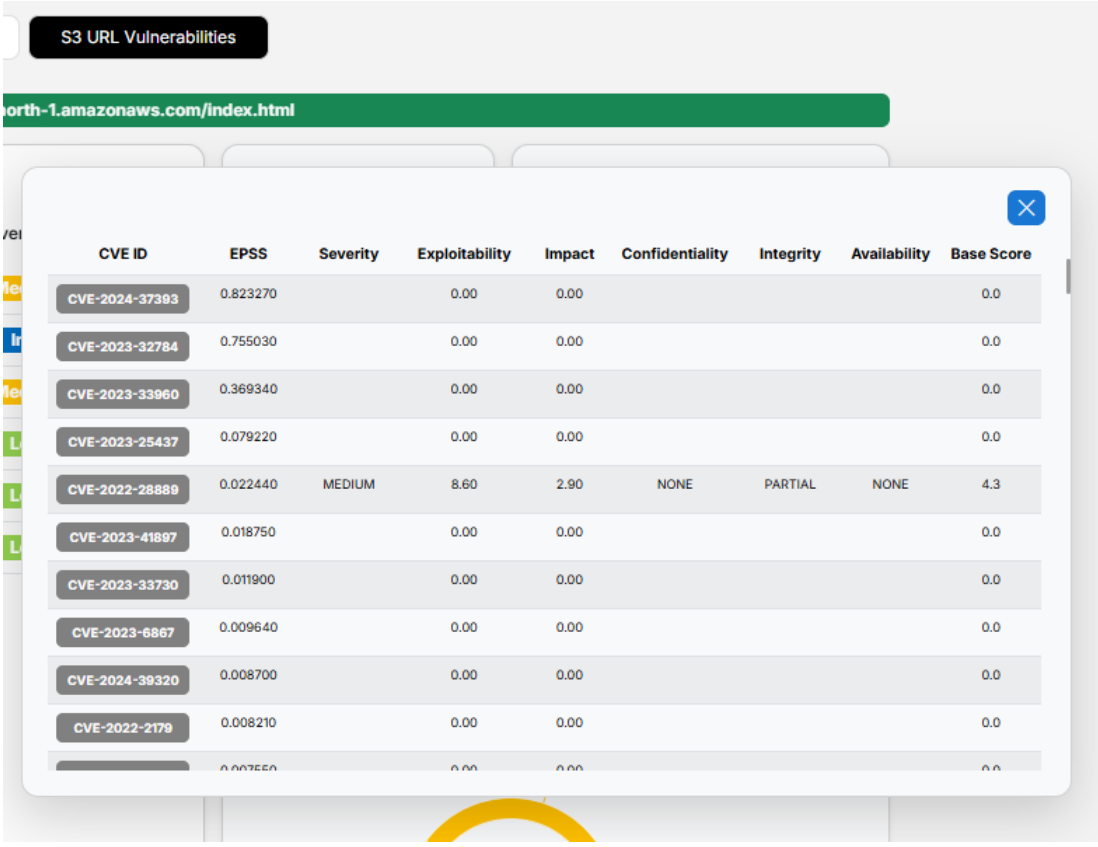
D. For testing AWS S3 URL,



Use https://save-testbucket.s3.eu-north-1.amazonaws.com/index.html url.



i. EPSS Card will popup by clicking any of the severity from the risk exposure table.

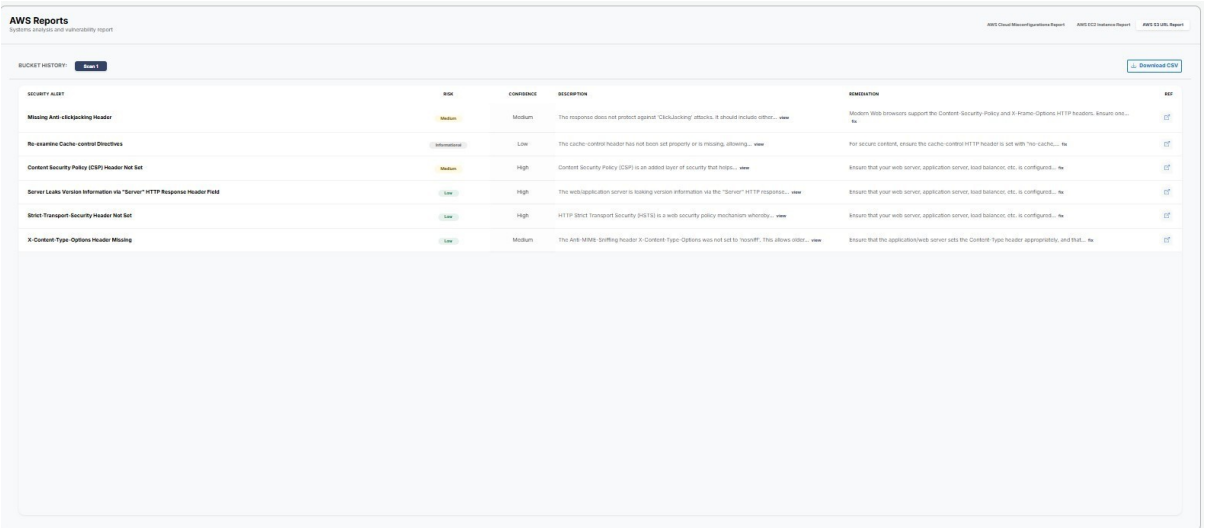


CVE ID	EPSS	Severity	Exploitability	Impact	Confidentiality	Integrity	Availability	Base Score
CVE-2024-37393	0.823270		0.00	0.00				0.0
CVE-2023-32784	0.755030		0.00	0.00				0.0
CVE-2023-33960	0.369340		0.00	0.00				0.0
CVE-2023-25437	0.079220		0.00	0.00				0.0
CVE-2022-28889	0.022440	MEDIUM	8.60	2.90	NONE	PARTIAL	NONE	4.3
CVE-2023-41897	0.018750		0.00	0.00				0.0
CVE-2023-33730	0.011900		0.00	0.00				0.0
CVE-2023-6867	0.009640		0.00	0.00				0.0
CVE-2024-39320	0.008700		0.00	0.00				0.0
CVE-2022-2179	0.008210		0.00	0.00				0.0

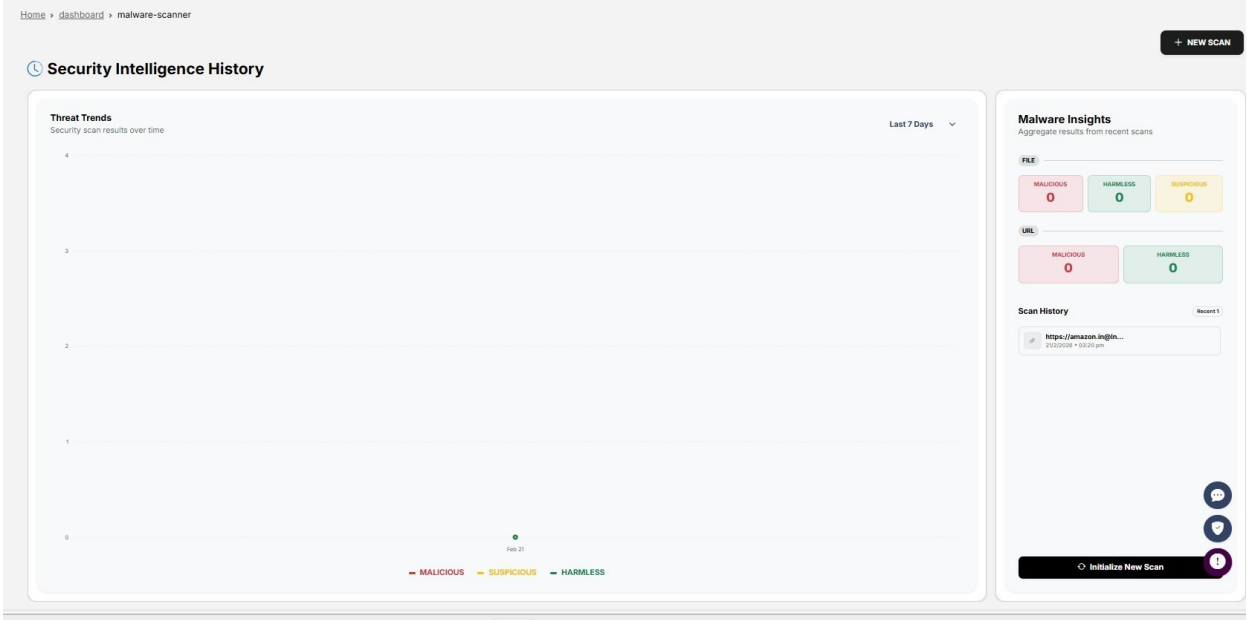
ii. Click on any CVE ID to redirect SAVE AI for remediation.

Note- Mic and PDF is working.

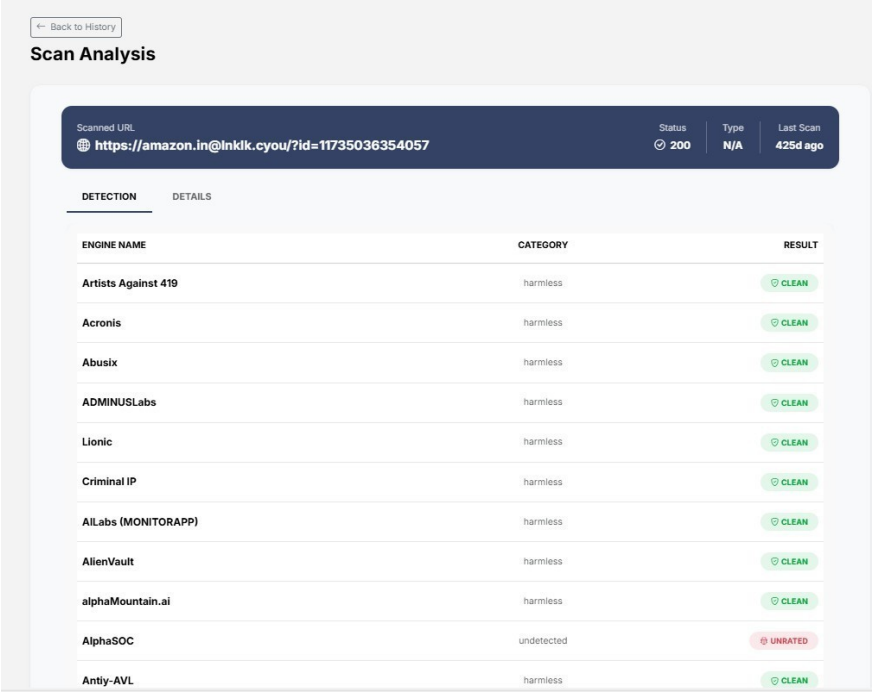
A. click show detailed report



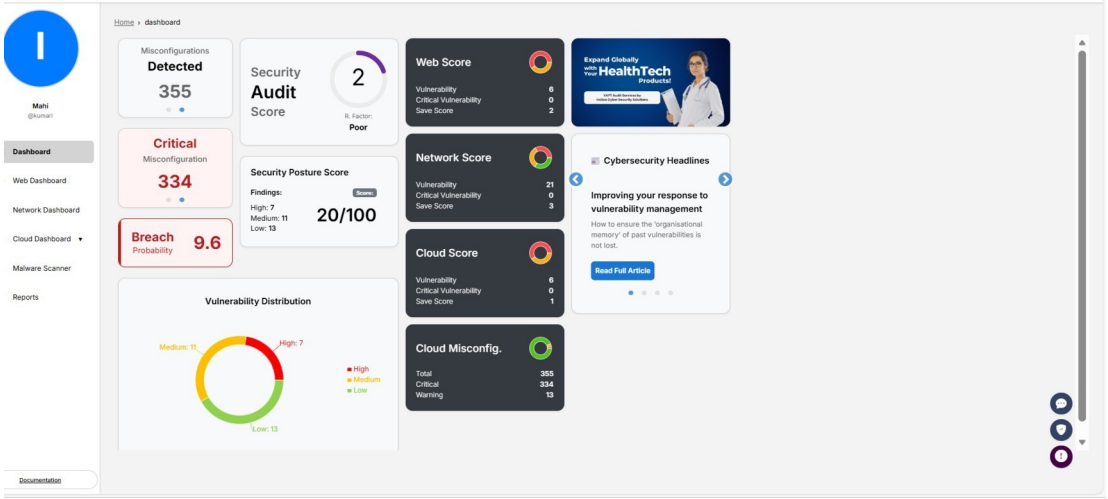
8. **For Scanning Malware** Click **Malware Dashboard** in left side navigation



A. For new scan click + NEW SCAN button.
B. Use https://amazon.in@lnklk.cyou?id=11735036354057 for testing.

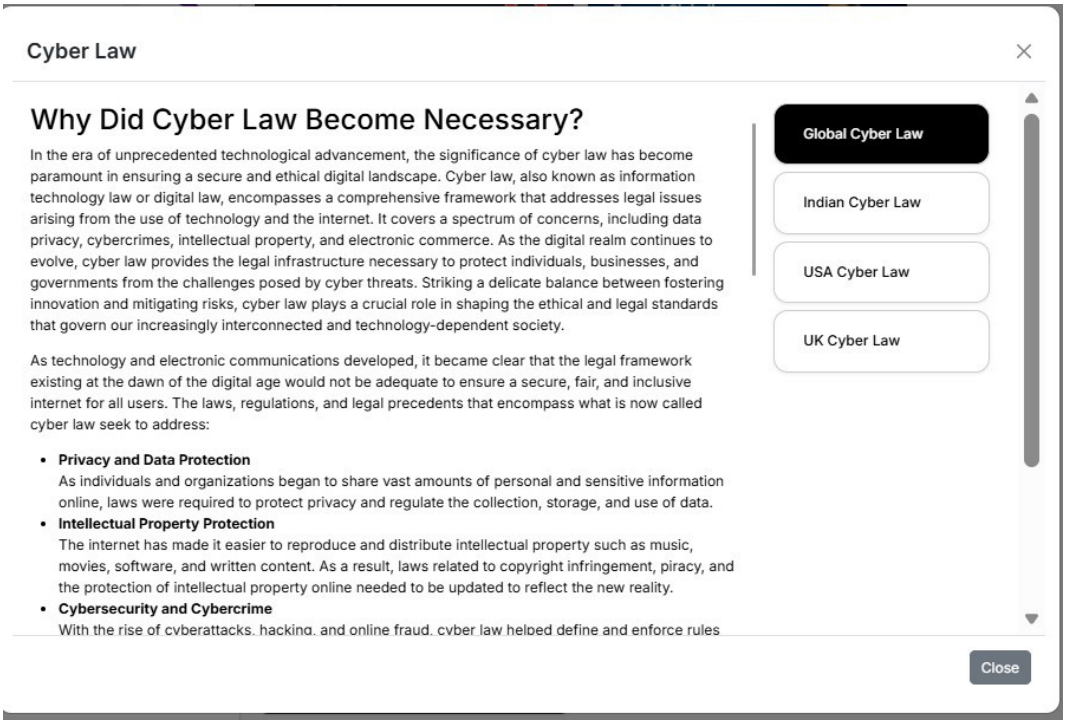


A. There is three button in Down Right corner in Dashboard.



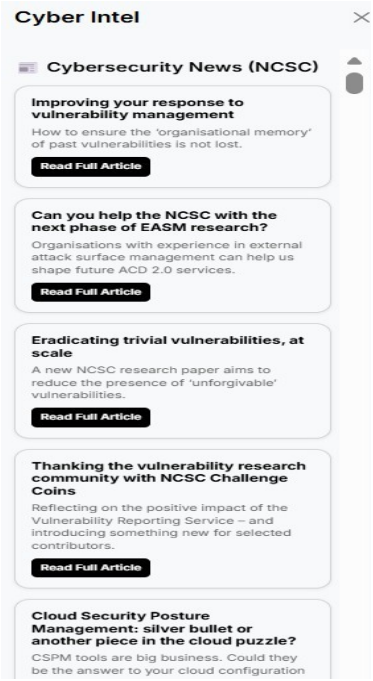
I. Click First button to open save ai.

II. 
ii. Click On second button to open Cyber law



You can see the laws of different countries too.

iii. Click on third button to open cyber intel.



iv. click on Read full articals to see the details.

Note:- Every Thing is working , I have checked buttons, mic pdf it is working..
